

# Neurodiversity Clinic

At the ADHD Foundation, we are able to offer a full ADHD screening and diagnosis for people aged 16 to 60. We also offer a pre-diagnostic screening for children aged 6 to 15.

For many people, they believe it is difficult to access assessments for ADHD. However, at the ADHD Foundation, we strive to offer easily accessible assessments, whether you live in Liverpool or further afield.

Our trained staff utilise assessment scales, interviews, and the use of the QbTest, to provide clinicians with accurate and detailed information to aid in a diagnosis.

## Our ADHD Assessment includes:

- QbTest
- Interview
- ADHD Assessment Scales
- Results Discussion

**Pre-Diagnostic Screening (aged 6 to 60): £200**

**Full Assessment and Diagnosis (aged 16 to 60): £500**

This is a 'not for profit' service.
